

Fantastic Beasts: Active Galactic Nuclei in Galaxies and Clusters

Prathamesh Tamhane
(UAH)

This presentation delves into the intricate mechanisms governing the behavior of Active Galactic Nuclei embedded within galaxies and clusters. I'll talk about processes driving the energetic emissions from these remarkable astrophysical objects, complexities of accretion, feedback mechanisms, and their profound impact on the evolution of galaxies.

ASTRONOMY ON TAP - ROCKET CITY

Tuesday, April 23rd @ 6 PM

InnerSpace Brewing Company

(2414 Clinton Ave W, Huntsville, AL 35805)

All Welcome!

Free Entry!
